Corelation Marks 15 Years of Transforming Credit Union Technology

SAN DIEGO – August 20, 2024: Corelation, Inc. proudly celebrates its 15th anniversary, marking a significant milestone in its journey of growth, success, and dedication to the credit union community. From day one, the company has been committed to delivering innovative core processing software paired with exceptional service, fostering a culture that attracts highly motivated professionals. Since its inception in 2009, Corelation has transformed from a visionary startup into an industry leader with over 400 dedicated employees, revolutionizing the way credit unions operate and serve their members.

Corelation was founded on the belief that the industry needed a fresh solution—a system built with today's technology to address the current and future needs of credit unions. Over the past 15 years, the company's flagship product, KeyStone, has redefined core processing, offering unmatched flexibility, scalability, and efficiency.

To date, Corelation has signed 236 clients, representing over $209 billion in assets and more than 13 million members. In its first five years, the team signed 33 clients and nearly doubled that number in the second half of the decade. Notably, the 200th client was signed aboard the USS Midway during the 12th Annual Corelation Client Conference in San Diego last year.

"Celebrating our 15th anniversary is a remarkable milestone for Corelation. Over the past decade and a half, we have remained steadfast in our commitment to deliver the very best in service and innovative technology solutions to credit unions," expressed Corelation President Rob Landis. "To reach this moment in our history is a testament to the hard work and dedication of our entire team, the trust of our clients, and our unwavering focus on empowering credit unions to better serve their members."

As Corelation reflects on this significant milestone, the company remains focused on the future. With a strong foundation built on innovation, client-centricity, and a passion for excellence, Corelation is poised to continue leading the industry and shaping the future of credit union technology.

Landis added, "We are excited for what the future holds and look forward to continuing our amazing journey."
